affordable solutions without compromise

affordable **solutions** without compromise

Eternity Flooring has quickly become one of the leading manufacturers and distributors of laminate in the flooring industry. Here you can find a myriad of possibilities to help transform your house into the home you desire. We are sure you will find the floor you are looking for in any one of our 10 flawless collections. Whether you seek for the elegant hues of the Classic Collection, the distinctive lines of the heavily embossed Prestige Collection, or the well designed and durable commercial grade Fierce Collection, you can rest assured that your selection will make your dream of a beautiful home into a reality. At Eternity we offer coordinating trim pieces, MDF base boards, glue, & underlayment to not only complete your project, but enhance the beauty of your new floor purchase. We aim to provide an unrivaled and enriching experience for all of our clientele by constantly scouring the globe for new trends, unique colors, and innovative designs and products. At Eternity we pride ourselves on superior quality and affordability. These two distinguishing traits set us apart from anyone else in the business and have provided us with an exceptional reputation within the flooring industry, as well as our community. Thank you for your interest in our brand and we look forward to welcoming you to the Eternity Family.

“We aim to provide an unrivaled and enriching experience for all of our clientele by constantly scouring the globe for new trends, unique colors, and innovative designs and products.”

The new wood of choice is decorative and practical, esthetically pleasing as well as environmentally friendly.

Solid Bamboo

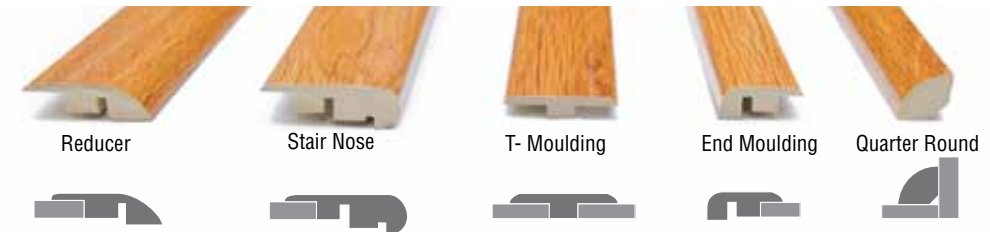

Wood is a natural product, therefore each plank will vary from each other in color and grain.

Accessories

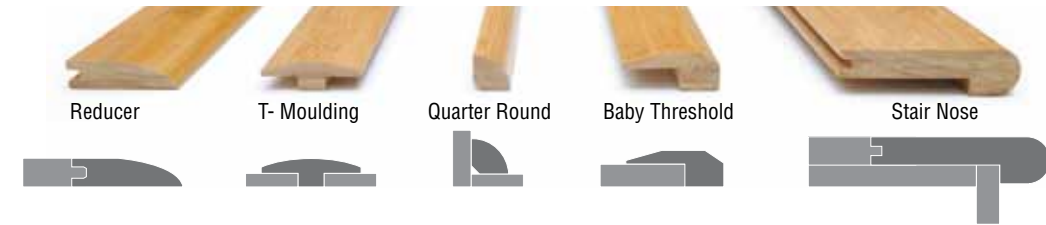

Trim and Moulding

For a finished look and smooth transition, we offer a complete selection of trims and mouldings that match all of our floor selections.

Laminate

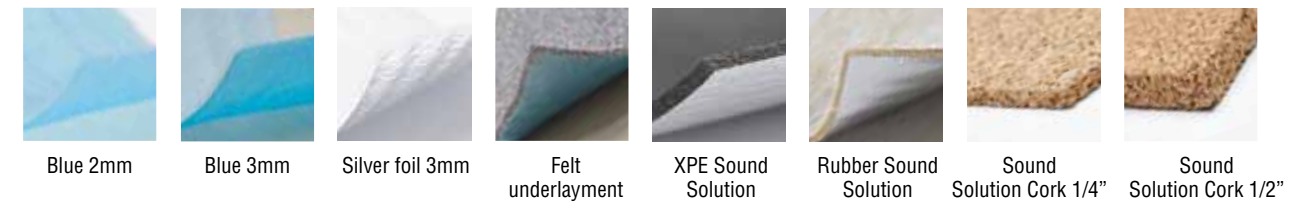

Bamboo

Underlayment

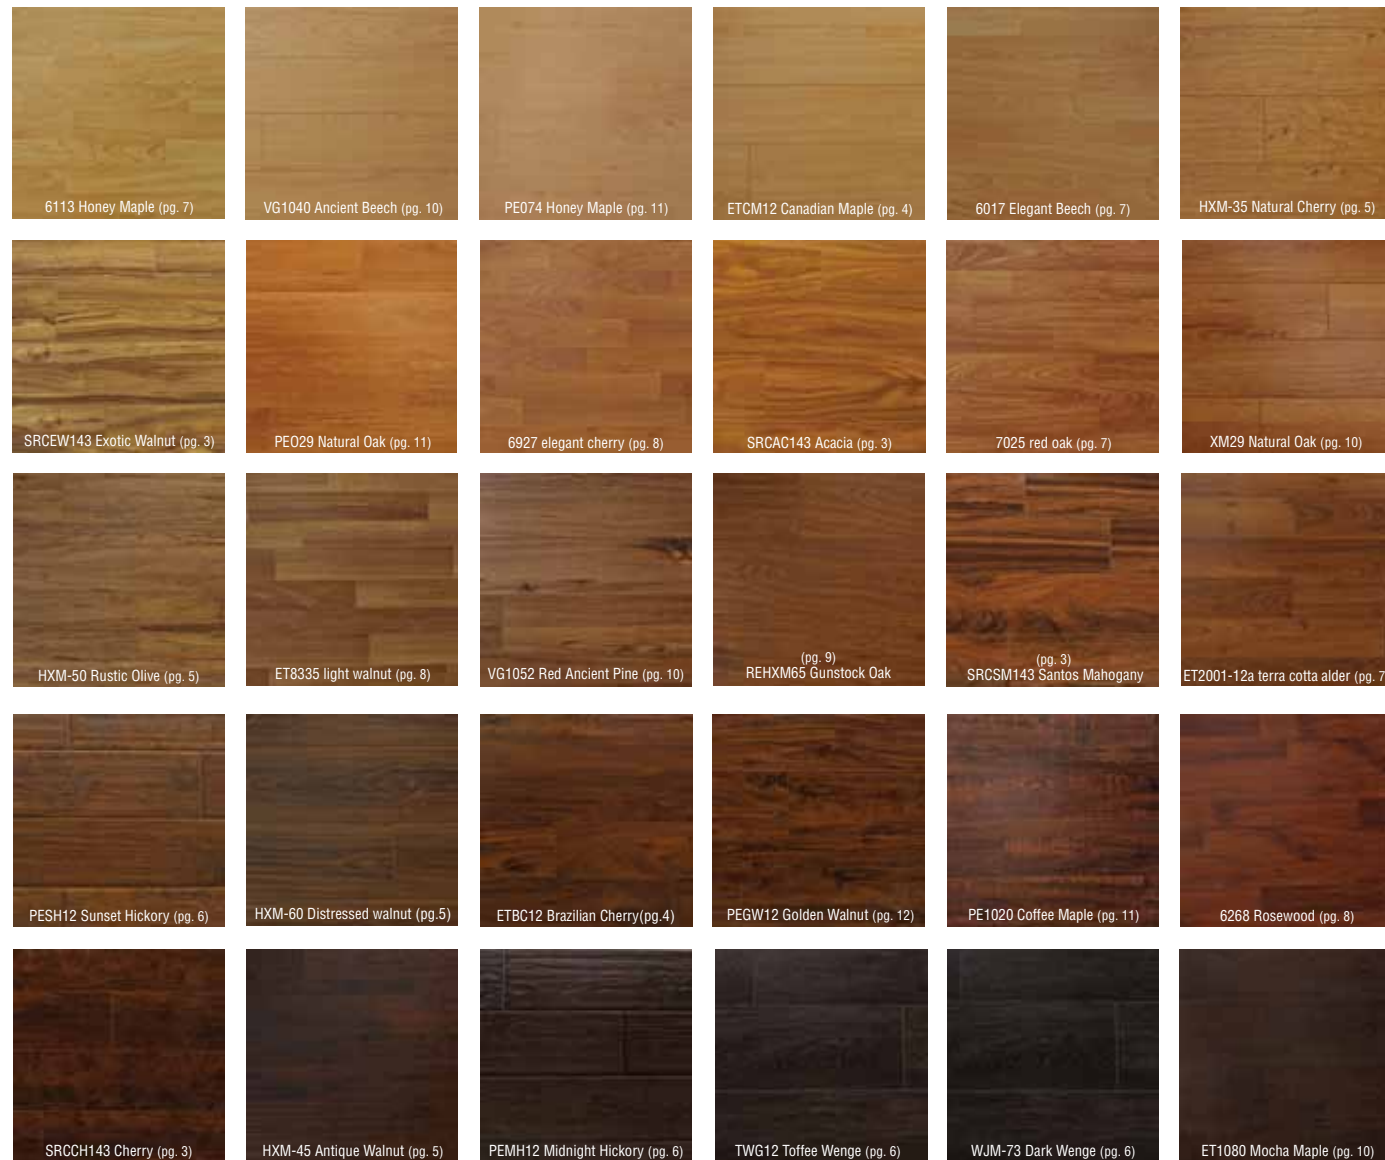

Underlayment should be installed prior to laying the planks.

It is used for seamless moisture barrier and for superior noise reduction.
